

Instructor: Petra Elmendorff

Petra graduated from the University of Bremen with a Masters in sociology. She holds additional certification in contemporary philosophical astrology, hypnotherapy, and Naturopathy.

Petra never stopped inquiring into the mystery of how the body, mind, and spirit work together. In discovering Mary Burmeister's teachings of Jin Shin Jyutsu, all her life studies fell into place. The Physio Philosophy of the Art united everything she was looking for.

An authorised instructor since 2002, Petra also studied with Haruki Kato for a number of years. She teaches Jin Shin Jyutsu classes worldwide.

"My whole life's journey has been dedicated the quest of consciousnesses, the deeper studies and understanding of the mind and its influence on the body and our life's choices."

- P. Elmendorff

Jin Shin Jyutsu® Special Topic Class

**3-Day Practicum: Body reading;
pulse listening; practical application**
Fri 1st - Sun 3rd November 2019
with **Petra Elmendorff**
Perth, Western Australia

The Special Topic Classes are an opportunity to look at specific Jin Shin Jyutsu topics in a more detailed and profound way. It offers a chance to study and amplify relationships among the many aspects of Jin Shin Jyutsu, with more interaction between the students and the instructor in smaller groups. Special Topic Classes are a flexible format which can vary in size, number of days and subject matter.

In this class we will be focusing on Pulses, Body Reading and practical hands-on demonstrations.

Body reading and Pulse listening

The focus of this class is the application of the Art of Jin Shin Jyutsu. It is an invitation to study how invisible energy can be recognized and experienced through the body. This is true for the art of body reading as well for the ancient technique of pulse listening.

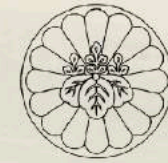

This class is for everybody and offers an opportunity to strengthen our natural intuition, to tap into a deeper knowledge about the language of the body. It is the awareness and understanding of the art of Jin Shin Jyutsu transferred and applied to our physical realities. We will all learn from each other by practicing on each other and observing and learning through demos.
